Order P. No. VB-Kit-16 or 20, 25, 30, 36, depending on front width (in feet)

Price: \$1.75 (ex.GST) per foot

Special fitments

* Vibra-Mats work well on John Deere 600 Series platforms, **with the stone guard removed** and 3mm shims fitted under hold down clips.

*F-NH fronts do not require hold-down clips. Order a mat and bolt kit only.

*Inter 810 fronts do not require hold-down clips if double-cut guards are fitted. On fronts fitted with "binder" fingers, use our 810 V'mat hold down clips with 2 x V'mat washers under each knife section retaining nut.

*Some comb fronts can be fitted with a Vibra-mat. They require a weld-on bolt kit only, e.g. HB 2140.

*Please advise header type, front type, knife type and width when enquiring or placing an order with your Dealer.

*The reinforced vinyl mat is fitted to rear of the knife and as it reciprocates, becomes a "live" surface to prevent lodging. *Prevents "bunching" or "lodging" on the header platform that causes grain to spill over the cutterbar.

*Eliminates the intermittent delivery to the concave that can reduce threshing ability.

*Prevents inefficient threshing of "bunched" crop, which walks grain out the rear of the machine with the straw.

*Smooth, continuous flow with no "bunching" maximises efficient grain separation, conserving horsepower and fuel.

Primary Sales supplies only genuine WCCO belting
All draper belting listed here is quality 24oz

DRAPER BELTING Price list

AGCO

			Ex.GST	Inc.GST
