

ADAPT-T[®] SEEDING SYSTEM

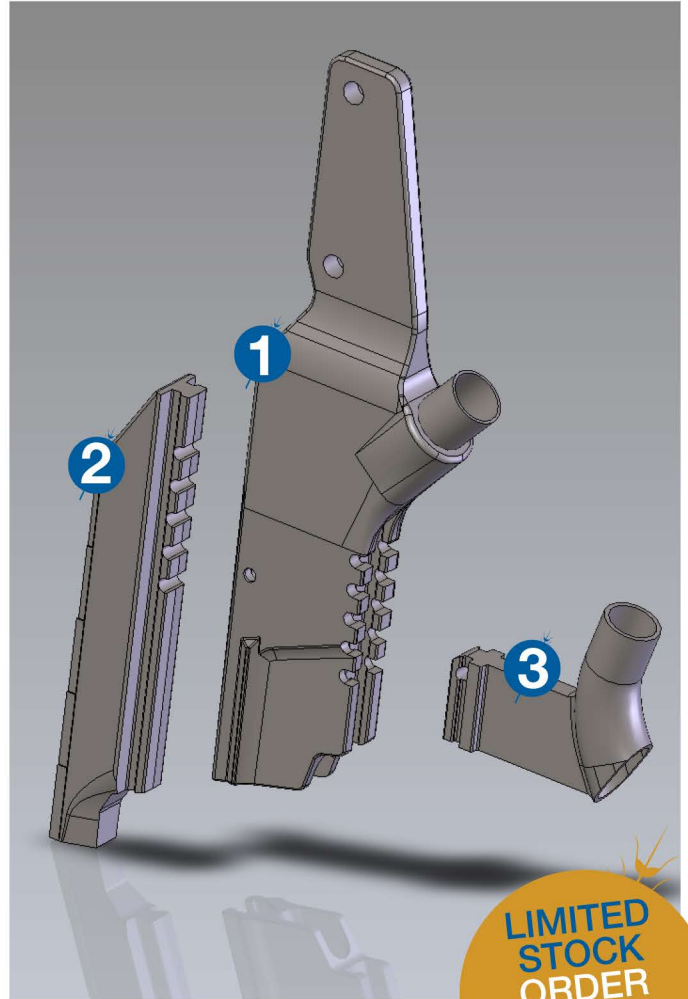

PRIMARY
SALES AUSTRALIA

ADAPTABLE FOR CONTROL IN HARSH SOILS

THE ADAPT-T[®] SEEDING SYSTEM PROVIDES GROWERS THE ADAPTABLE GROUND ENGAGING TOOL TO GIVE THEM THE CONTROL TO COPE WITH HARSH AUSTRALIAN SOIL CONDITIONS

- > Streamlined profile to reduce soil-throw
- > Adapt-T[®] body provides flexibility to switch from inline to paired row or single-shoot to double-shoot
- > Maximise wear-life and reduce overall cost per hectare through the patented incremental Adapt-T[®] point. 76mm of wear-life. 5 Easy change increments. Fully carbide protected standard 150mm with 200mm option
- > Greater control over seed placement and seed to fertiliser separation. The Adapt-T[®] provides 66mm of point to boot height flexibility and easier control through the 5 increment boot adjuster for easier in field-change of boot height
- > Adapt-T[®] Seeding System has compatible options to work with liquid systems, granular fertiliser and wetting agent
- > Simple in-field change with roll-pins
- > Designed to maximise the increased Quantum envelope

LIMITED STOCK ORDER SOON FOR 2019 SEASON
