

Harvest Catalogue: How to Order

Things to know before you order:

- The header front brand and model
- Width of the front

Example front:
MacDon D60
40ft

1 Open the most recent Harvest Catalogue, find the brand of front

e.g MacDon

2 Decide on the number of fingers on the knife guards (4,3,2 where available) refer to the Adapt-A-Gap Crop Finger System page for more information on which guard is right for your crops and conditions

e.g 4 Finger Guard for light crops

3 Locate the model number of header front, and if it is a single or dual knife

5 If you don't require a lift kit and don't have skid shoes you can order a bolt kit. However you can also use the existing hardware on the front with our Primary Sales Adapt-A-Gap guards e.g FK-MAD60-BK40

6 If you need a lift kit select the lift kit on the same line as your identified guard kit. You will not need the bolt kit as a lift kit includes correct bolts. Fronts with skid shoes will require different lift kits, please call (08) 9250 3500 for more information e.g FK-MAD60-LK40

7 You can also add cereal extensions (FE 13/17/21) or platform extenders (FE50-WA) to reduce grain loss. Price is for a full set, including fitting tool to match your header.
